

## Flying Squirrels

### Cool Facts about Flying Squirrels:

- The squirrel glider's body is 8 inches (20.5cm) long. But its tail is 10 inches (25.5cm) long!
- Squirrel gliders can glide for a distance of up to 164 feet (49 meters)!
- A full-grown squirrel glider weights only a little over 6 ounces (170g).
- Other names for the squirrel glider are flying squirrel or sugar squirrel.
- Squirrel gliders eat fruit, insects and the sap from the eucalyptus tree.
- Keeping squirrel gliders as pets was a common practice in the 1800's and the practice is making a bit of a comeback.

### Discussion Circles:

1. Think of some people you trust. What makes you trust them? What can you trust them to do?
2. What are some promises God makes in the Bible?
3. When is a time you or someone you know has acted in a way that showed trust or faith in God?

*For we live by faith, not by sight. 2 Corinthians 5:7*
