

Orcas (Killer Whales)

Cool Facts About Orcas

- The dorsal fin on a male orca can be up to 2.1 meters tall (7feet).
- Orcas can live for over 50 years.
- Orcas can weight anywhere from 3,600 – 5,400 kg, (8,000 – 12,000 pounds)
- Orcas live in groups called pods.
- Each pod makes its own unique sounds. And whales from that pod can hear these sounds from kilometers away.
- An average sized orca will eat over 225kg (500 pounds) of food per day.

Discussion Questions:

1. What are some things little kids need to learn? What are some things older kids need to learn?
2. What are some of the problems that can happen if a kids doesn't learn the things you described?
3. What are some ways adults coach and teach kids what is right?
